

WHICH TECNU® SHOULD I USE?

A Quick Guide to Preventing and Treating Poison Ivy and Oak 

TECNU ORIGINAL® vs. EXTREME®

Both remove the rash causing oil found on poison ivy, oak and sumac.

Original is safe to use on skin, pets, tools **BEFORE** the rash appears.

Original can be used with or without water.

Extreme can be used **BEFORE OR AFTER** the rash has appeared (protip: sooner is always better!)

Extreme gently exfoliates.

TECNU CALAGEL® vs. RASH RELIEF

Both are for use **AFTER** a rash has appeared.

Both provide topical itch and pain relief caused by

- poison ivy & oak
- insect bites
- sunburn

Calagel is a smooth gel that goes on clear.

Rash Relief's spray application is ideal for not touching an outbreak.

TECNU DETOX WIPES™

For use **BEFORE** the rash appears.

- Removes the rash causing oil found on poison ivy, oak and sumac.
- Waterless and individually wrapped.
- Detox Wipes are safe to use on skin, pets, tools.
- Also removes sap, pitch and tar.
